

Suman

VSAT Antenna Solutions

Suman Satellite Technology Company

Suman Satellite Technology Company designs and manufactures full range of premium quality VSAT antenna for both the military and commercial sectors. It is now one of the largest VSAT antenna manufacturers in the world.

one week lead time delivery on most of the batch order requirements. Suman's also provide logistics support for its client and this is part of the overall Suman experiences.

Suman has deployment sites in over 150 countries. Suman's projects range from the mission critical Fixed Earth Station Gateway, terminal station on an offshore Oil Rig Platform, to Stabilized Ship-Based antenna system.

Features:

- high efficiency.
- fine sidelobes characteristics, RF patterns meeting the requirements of the recommendation of ITU580 IV.
- framework of fastness and stabilization to the antenna can bear the survival wind speed of 55m/s.
- favorable withstanding erosion and rust capability as full-aluminum materials to be used above the antenna's hub and the coat of all of steel parts to be processed by heating soak zinc.
- every parts have highly processed precision and no need marks on the parts when installing, it will not bring to reduce the precision for whole of antenna when installing repeated.
- especially noted for extremely convenient to install it, easy and fast to aim it at the satellite.

Premium Quality: Suman antenna product lines are originally designed for military applications. They are in full compliance of ITU580 IV requirements.

Reliability: Suman antenna enjoys its industrial reputation on reliability. Suman is an ISO9001 company. Its R&D, production, sales and after sales services are strictly adhere to the ISO standards to ensure consistency in product and service quality.

Easy to Setup: As part of the military-spec requirements, Suman's antenna products are designed for maximum level of fault tolerance and easy set up in the field.

Services: Suman's well funded inventory stock allows
